

Manokotak Migrant Ed STEAM Night

March 22, 2024

On March 22, 2024, Manokotak “Nunaniq” School hosted their STEAM Migrant Ed Night. During the night, students and their families had the option of participating in three different STEAM based stations; magna tiles, play doh, or robot building.

When families first walked in, children got to pick which station they would like to start with while their parents filled out the parent survey. Families then spent the night building, creating, and having fun together.

There was a wide assortment of refreshments that families could snack on while they worked at their stations. Families also had the to opportunity to check out the Migrant Ed Book Fair that was happening at the same time.

We would like to thank Shawna Bragan, Jared Garlick, Lacy Davis, and Adrianna Najjar for helping with Migrant Ed Night.
