

Go Wild for Reading!

KNW Migrant Ed. Family Night 1

Reading in the Wild

Students built forts in the “forest” and enjoyed many books about wildlife and the great outdoors. Students were able to take home books to share with family. Families also enjoyed using wildlife photo props to take pictures and take home a printed copy.

Salmon River and Writing

In another center, Students used food items to make a salmon river and fishing pole. They wrote about their snack describing it through their five senses and used exciting descriptive vocabulary or by drawing pictures.

Kids & Families made animal crowns to wear!

Hunting for Nouns

Students used bow and arrows to hunt in the wild for various animals. They were encouraged to read each noun as they hit the targets -older students used more specific names and younger students read more generic simpler terms.

Animal Movement Walk

Students followed directions to move down a path of different wildlife animals and read the cards to act out each animal’s movements. They enjoyed balancing like a bird, climbing like a racoon, and leaping like a deer.

Students participate in the movement walk.

Wildlife Crowns

Students were able to create and wear their very own animal crowns at our craft center.
