

# TWIN HILLS SCHOOL

## School Improvement Spring Update

### Goal 1 - Reading

Goal 1 is to improve reading for K-5 students. It has been extremely helpful to have a fully staffed school. K-5 students are making progress in reading and becoming more confident readers. About 20% of actions/strategies are complete or implemented.

### Goal 2 - Attendance

Goal 2 is about improving student attendance rates. The goal is for individual student attendance rates to increase by 10% from last year. As through the end of February, 50% of students were on track to meet that goal. This is up 8% from the mid-year progress report

### Goal 3 - Engagement

Goal 3 is to continue to develop effective engagement strategies for parents and community. The School Success Team is exploring the idea of developing a school-wide morning assembly. The ultimate goal is to create an engagement plan.

### Spring Update!

In 2018, Twin Hills School was designated as a comprehensive support and intervention school (CSI) based on a number of performance indicators. As you may already know, Twin Hills will continue to be in the CSI level but will receive additional supports from the Alaska Department of Education to continue improvement efforts.

Twin Hills School continues to implement the current plan but is also planning for the future. This includes a school-specific training program to meet the needs of the staff and address multi-grade classrooms. Additionally, there will continue to be efforts to build a community engagement plan focused on attendance.
